

Cutting guides.

Accessories for hand cutting torches X11, X21 and X511

Roller guide

The cutting guide wheels roll freely, even under harsh conditions. By controlling the torch height and position, all the operator needs to manage is the optimum cutting speed. The result is a cleaner, more precise cut surface every time, with less clean up time and effort.

Art.No. 341711/341712

Circle cutting guide

High-quality circle-cutting device, for narrow tolerance and high cut quality when cutting circles and holes with manual gas cutting.

The circle-cutting device is used together with AGA torches and fits to 3 cone nozzles.

Art.No. 341713

Cutting guides features

- Adjustable height of the cutting guide
- Angle setting for cutting variability
- Adjustable width between the wheels
- Produced from durable zinc steel and brass material
- Very user-friendly
- Makes cutting work much easier
