NEW 2025

Kvillinge Splitting Axe

Combine the perfect balance, control and strength in every swing.

This is our new and updated splitting axe. A robust and well-balanced axe, designed for medium to large logs. The redefined wedge shape and added weight provide more driving force through the wood. The edge is curved to reduce bounce, while also biting into the wood and holding just enough to help turn logs, without getting stuck. While the added weight allows for deeper penetration into the wood, extra care has been taken to ensure the axe never feels heavy in hand. The handle is slightly curved and crafted to combine the perfect balance, control and strength in the swing.

Its design draws inspiration from classic Swedish splitting axes. The axe is hand forged and made from quality steel in the forge at Hults Bruk and we offer a full lifetime warranty on the axe head. Maintain it well and Kvillinge will be a trusted companion for years to come.

- The head is designed for most efficient splitting and to reduce bounce
- Designed with a 1.9 kg head for superb splitting force
- Wooden handle made from American hickory, treated with linseed oil for better grip even when wet
- Protective axe sheath made from sustainably produced Swedish leather
- Perfected balance for ergonomic handling and excellent driving force
