

**The silent revolution
takes a step forward**

QUIETE Range

Introducing the new QUIETE Range

This is why ABAC has designed the new QUIETE series: to offer you even more peace and comfort in your working environment without compromising performances.

QUIETE runs at 59 dB(A)—as discreet as a calm conversation, never disruptive. Under the uniquely designed Italian enclosed pump beats a powerful heart. The QUIETE series features a direct-driven element available in two versions, 1 and 2 hp, reaching up to 9 bar of pressure, allowing you to use specialized tools.

The QUIETE series is available in four tank options: two portable tanks of 6 and 20 liters and two mobile tanks of 24 and 50 liters, providing flexibility for various applications. QUIETE provides clean air and long runtimes with minimal servicing, thanks to its oil-free, direct-drive build.

// Easy maintenance

With its oil-free, direct-drive design, QUIETE cuts down on maintenance—keeping your workflow uninterrupted.

// Silence and Compactness

Save space around you with a silent, compact yet powerful air compressor with an air displacement up to 230 l/min.

// Safety

The enclosed pump design shields you from heat and moving parts—work safely, worry-free.

// Versatile

With up to 9 bar, QUIETE powers a wide range of specialised tools.

// Plug and Play

Easily reach the on-off button directly on the instruments kit for simple startup.

Ideal for a wide range of applications
